

LÜFT®

QUALITY IS NOT EXPENSIVE IT'S PRICELESS

# *Catalogue*

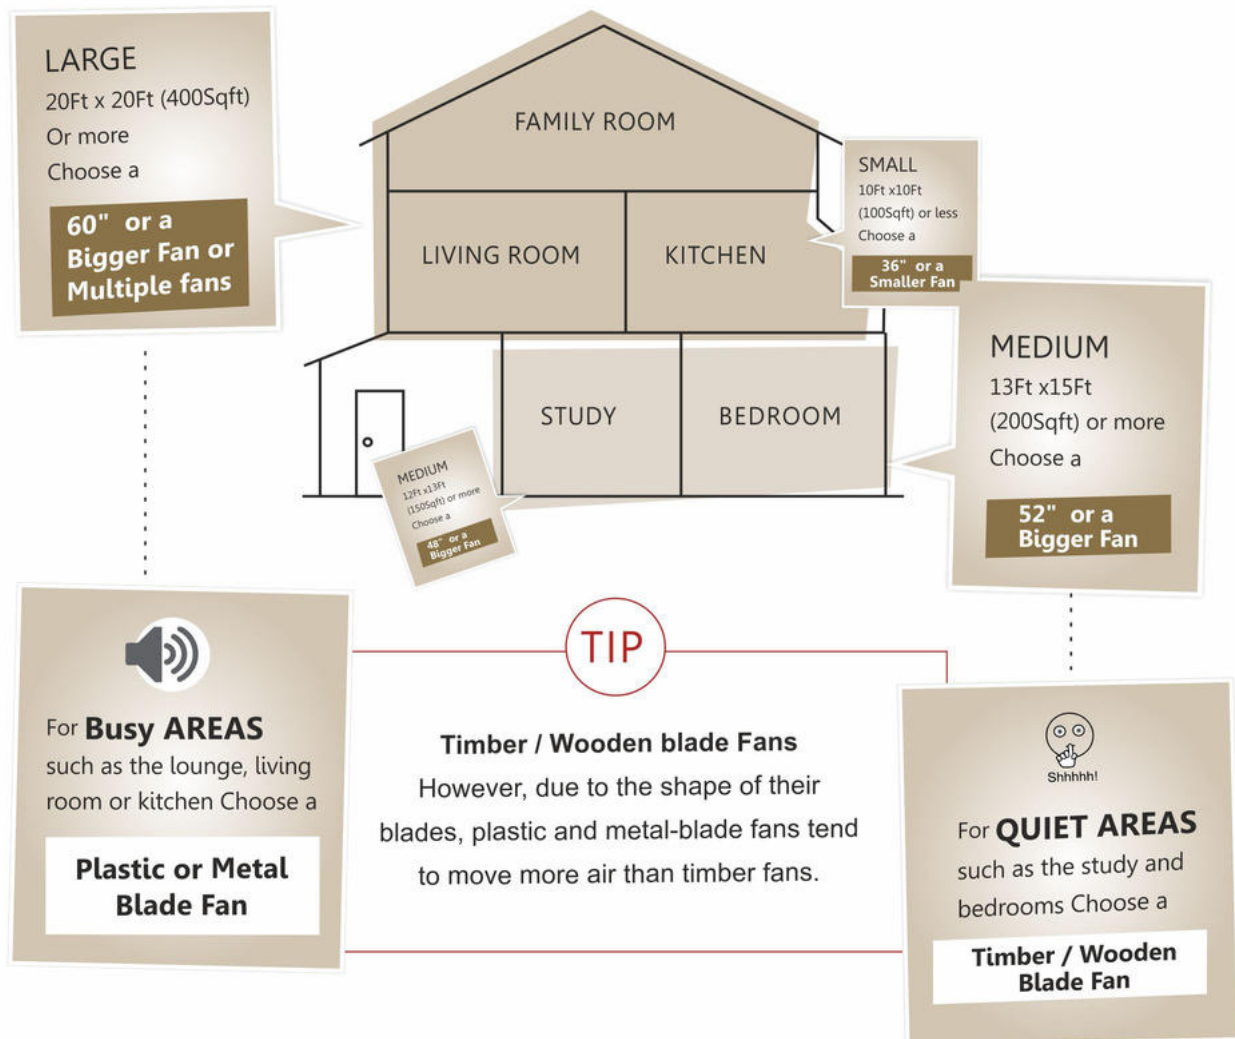

2023-2024 (1st Quarter)

## HOW TO FIND THE **PERFECT FAN**

### IF MY ROOM SIZE IS...

### WHAT IF MY ROOM HAS A HIGH CEILING?

If your ceiling height is 10Ft or more you may require:  
Extension rod (You are in luck as almost all Luft fans come with an optional extension rod)

Fan should be installed at least 12" from the ceiling with at least 7.5Ft from the blades to the floor.

## IT TAKES WISDOM TO EXPLORE THE WAY AND COURAGE TO MAKE A CHANGE.

### LUFT was created with an inherent intent to 'break the stereotype' when it comes to home décor.

A carefully chosen fan creates an impact on your environment that alters and elevates your mood while also elevating the look of your home. After all, your personal environment is what contributes to your overall well-being, bringing your best version to the forefront.

Backed by science, and powered by the latest in technology, LUFT has grown to become a leader in Fans and Curtain Motor industry.

As a company, we pride ourselves on the quality and workmanship of every product we produce & distribute. With people and a distribution network operating over two continents, LUFT is leading the way in product design, along with three levels of quality control over a broad range of price points. To specify, we fill in every space and meet your unique needs that fit your budget.

LUFT offers the following products to enhance the 'Class Quotient' of your home:

#### LUFT FANS:

LUFT believes that the fifth wall is as important as the other four walls of the house, to create an aesthetically pleasing home. We bring you the largest range of exquisite designer fans in India, which breaks the monotony and raises the décor of your home which echoes elegance and comfort. Most importantly, they are manufactured in so many sizes to fit in any given space.

Our special emphasis on robust product quality ensures that the sheer beauty of LUFT Fans never fades. Our collection includes genuine, high quality and competitively priced **Exquisite Fans** from topmost international players. What sets us apart is our '**service excellence**', which is an integral part of our value system, making your LUFT experience, hassle-free. To ensure your peace of mind, all LUFT fans come with a two-year warranty.

The prime focus of LUFT is introducing fans from across the globe that circulate air using the latest technology for efficiency and convenience, with a seamless control and premium design that's stellar. Our fans cover all requirements for homes, including decorative styles to slim designs, traditional designs to modern masterpieces that blend effortlessly into any interior. The options that we have will make you smile as you get to choose from different sizes, and designs, fitting into different spaces - ranging from the ceiling, floor fans & wall mounted to tower fans.

Our national network has helped our fans find a presence in diverse areas - from some of the most luxurious places like resorts and palaces to the intimate and personal spaces in homes and commercial establishments around INDIA. That's huge and we take immense pride in bringing you comfort wherever you go.

#### LUFT MOTORS:

Your home is priceless artwork for you and we at Luft acknowledge it. We believe that normal is boring. Conventional curtains have a limited role to play in your home aesthetics. LUFT offers ultra-efficient and ultra-quiet motorized systems for all kinds of curtains and blinds. LUFT motors come in various specifications to suit any commercial or domestic needs.

The product line consists of:

- Roller Blind Motors
- Remote Control Handsets

All our motors can be controlled either with remote control or can also be integrated with any home automation solution. Quality and winning your trust matter the most to us and hence LUFT motors come with **5 years warranty**.

**OUR VISION:** To be the leading National and International provider of innovative, technologically advanced, and energy-efficient products that enhance our customer's environments.

**OUR MISSION:** To light our customers' lives with exciting products that are environment-friendly and fashionable, delivered with expertise and unparalleled service.

#### OUR VALUES

- Be Innovative
- Be Caring
- Be Ethical

Fanaway is a revolutionary Australian design that has taken the world by storm. With one flick of the switch, Fanaway transforms from a sleek sophisticated, pendant light into an energy efficient ceiling fan. The secret lies in Fanaway's unique retractable blade technology. Turning the fan on creates a centrifugal force which deploys the distinctive blades to circulate air within a room. Switch it off, and the fan blades automatically retract and conceal, creating a clutter-free overhead environment.

#### Awards

- Home Beautiful Product of the Year Awards 2008, Finalist
- Best Homewares & Kitchen Product or Range, Finalist - Home/Lifestyle, The Gift Awards 2008
- Most innovative Product or Service, Finalist - Conscience & Creativity, The Gift Awards 2008
- Best Homewares & Kitchen Product or Range, Finalist-Australian Designed and/or Manufactured,
- The Gift Awards 2008

## LUCCI AIR

Lucci air is well known for it's great quality, with a heavy focus on technology and product development.

The Lucci brand offers the latest on-trend designs, sourced from around the globe, to suit every style of home.

The range offers great value with options for every budget.

The Bayside fan range has been developed to be simple in design with a focus on energy efficiency.

Constructed from high quality materials, Bayside fans are suitable for both indoor and outdoor applications.

LUFT has grown to become a leader in the Fans, Coatings and Motor industry.

As a company, we pride ourselves on the quality and workmanship of each and every product we produce & distribute.

With people and distribution network operating on two continents, LUFT is leading the way in product design, along with three level of quality control over a broad range of price points.

# STEP BY STEP CEILING FAN INSTALLATION GUIDE

## Installation Safety Rules

- ⚠ Shut the power off at the circuit breaker box before beginning.
- ⚠ Verify there are no obstructions at the installation site.
- ⚠ Use only clamps / rods & hooks which come with the fan.
- ⚠ Read the manufacturer's instructions for additional caution, safety, & warning information.

## Recommended Tools for Installing a Ceiling Fan

- |                                 |                       |
|---------------------------------|-----------------------|
| 1. Crescent Wrench              | 6. Screwdrivers       |
| 2. Cordless Drill with Long Bit | 7. Electrician's Tape |
| 3. Voltage Tester               | 8. Ladder             |
| 4. Wire Cutters/Strippers       | 9. Dusk Mask          |
| 5. Pliers                       | 10. Safety Glasses    |

## Where to hang a Ceiling Fan

Choosing an installation site is as important as selecting the ceiling fan itself. The right location ensures your safety as well as the fan's performance and efficiency. When selecting an installation site, consider the following details:

Always install a ceiling fan in the center of Useable area & not in center of the room.

- Ceiling fans provide optimal airflow when hung at least 7.5 to 9 feet above the floor.
- Ceiling fan blades must hang at least 10 to 12 inches below the ceiling.
- Ceiling fan blades must be at least 24 inches away from wall, doors, cabinets, and posts.
- Confirm the location on the ceiling and the surrounding area is not cracked or damaged.

## INSTALLATION PROCEDURE ON FALSE/GYPSUM CEILING

- Fix a wooden box between concrete ceiling and the false (gypsum) ceiling, secure the box on the concrete ceiling with screws.
- Install the false ceiling just touching the base of the wooden box.
- Fix the fan on the false ceiling with screws. The screws will fix securely on the wooden box, hence taking the entire weight of the fan.
- **Kindly note our controller will sit in the fan cup on the top, hence pre installed rods cannot be used to fix these fans. Designer fans can be fixed only on rods provided by the manufacturer.**

## INSTALLATION PROCEDURE ON WOODEN CEILING

- Our fans can be directly installed on a false wooden ceiling
- A wooden ceiling of minimum 12mm plywood is required to install our fans directly, make sure the wooden ceiling is strong enough to take the weight of the fan

## INSTALLATION PROCEDURE ON CONCRETE CEILING

- Our Fans can be directly installed on a concrete ceiling. However if you have pre-installed FAN HOOK or FAN BOX in your concrete ceiling, you might need to purchase a fabricated clamp to install the fan properly. The fabricated clamp is available with us at an extra cost.
- Our fans can be fixed only on the rods & mounting kit provided along with the fan. Pre installed rods cannot be used to install designer fans including our fans.

**DO NOT CONNECT THE FANS  
WITH REGULATOR / AUTOMATION DIMMER  
WORKS ONLY WITH INCLUDED REMOTE CONTROLLER**

## **WOBBLE**

- Always use the rods, hooks, clamps which came along with the fan, installing the fan on other hooks/rods/clamps might cause wobbling or noise.
- Ceiling fans tend to move during operation due to fact that they are not rigidly mounted. If they were, they could generate excessive ceiling vibration and stress on their mountings.
- Movement of a couple of centimetres is quite acceptable and does not suggest that the fan will fall down. • **WOBBLING OF FANS, BUMP IN THE NOISE OF THE FAN IS NOT COVERED UNDER WARRANTY**

## **BASIC INSTALLATION INSTRUCTIONS**

1. Make sure the ceiling, where the fan is to be installed is capable of taking atleast 45kgs load, also make sure the ceiling is even and straight. Uneven ceiling is one of the causes for fan wobbling & noise.
2. Kindly verify all the components are in place before assembling the fan.
3. Any designer fan including Our fans cannot be fitted on pre-installed rods.
4. Always use the rods, hooks, clamps which came along with the fan, installing the fan on other hooks/rods/clamps might cause wobbling or noise. In case of a ball type hook and clamp, make sure the ball sits securely in the groove of the clamp.
5. Never connect a remote and a regulator together for the same fan.
6. Never connect the fan to automation dimmer, power on-off is possible through automation, speed control is not possible. However few of the AC Motor fans can be speed controlled through automation. Please consult with us for such models.
7. Always use the remote and controller provided along with the fan, if other controller and remote is used, it might burn the motor.
8. Make sure the fan is rotating in the right direction. When you look from below the blades must rotate anti-clockwise. (blades must rotate from right to left).
9. For optimum air delivery, make sure the fan is atleast 7.5 to 9 feet above the ground and the blades are atleast 10 to 12 inches below the ceiling. Also make sure the fan blade is atleast 24 inches away from the closest wall.
10. To avoid any noise make sure all the screws and nuts are secured properly, no loose wires or components are left, no screws or nuts are left behind in motor housing or in light kit.

For any technical assistance Please call (Mon-Sat 11:00 Am to 6:00 Pm)

**+91 9844582500 | 9844572500**

**Kindly mention the correct fan model name while seeking assistance**

## UNDERSTANDING THE AIRFEEL MENTIONED IN OUR CATALOGUES

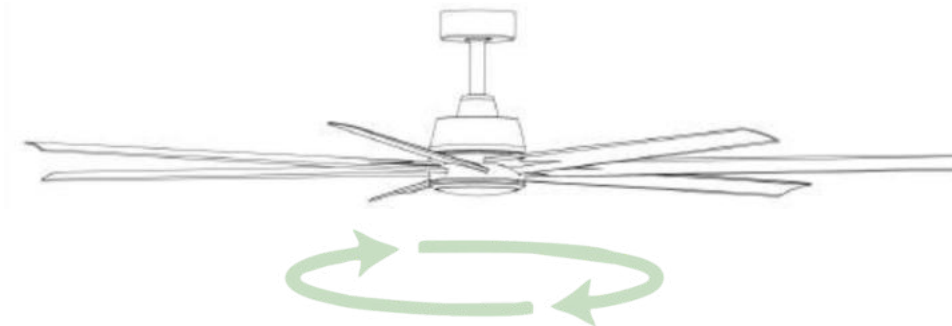

No. of Bars	WHAT IT INDICATES
9-10	VERY GOOD / EXCELLENT AIRFLOW
7-8	GOOD AIRFLOW
5-6	MEDIUM AIRFLOW
3-4	LOW AIRFLOW
1-2	TO BE USED AS DESIGNER ELEMENT

Airfeel 

As per our perception we have tried to give you a fair idea of the airflow of each of our fans.

Kindly note the Airflow perception of each individual is different, hence giving a Live demo of the fan to the client is Recommended.

## WHY IS THE CEILING FAN NOT GIVING ENOUGH AIR?

1. Check if the ceiling fan is rotating in the right direction. It should always rotate from RIGHT to LEFT. (Anti-Clockwise)
2. The size of the ceiling fan is not appropriate to the room size, the fan might be too small for the space. Most of the light dealers ask "how big is the room?" before recommending lights to their clients. Similarly, please ask the size of the room before recommending a Fan.
3. The Fan is not installed at the appropriate height. Its either installed too high or too low.
4. The Fan is installed too close to wardrobes, cabinet or other walls.
5. The Fan is installed far away from the service area.
6. You haven't checked the Airfeel Meter  before recommending the fan.

## CEILING FAN INSTALLATION SERVICE

**Our New Installation Service Price Is Only ₹1000/- For Your First Fan And Just ₹500/- Each For Any Additional Fans That You Need To Install\***

### **FAN INSTALLATION pricing includes:**

- Travel distance of 20km from the store where the fan is purchased. Locations beyond 20km will only be accepted by negotiation on travel time & distance.
- The site should be ready as per our requirement with the concrete/wooden/false/gypsum ceiling capable of taking minimum weight of 45kgs.
- Maximum 3m ceiling height.
- Any works outside this scope will be discussed & charged extra.

## TERMS & CONDITIONS

### **OUR RESPONSIBILITIES**

- Normal manufacturer's product warranty will be applicable.
- Installation will be performed by a qualified licensed electrician and may be an employee of Luft fans or an independent trained contractor as solely determined by us.
- The nominated contractor will contact you to book the installation date and time that is suitable to you but must be during normal weekday hours.
- Installation bookings may be made outside of normal business hours or weekends by mutual agreement, however, may incur a surcharge.
- If you have a complaint after installation you must provide evidence of that complaint and/or allow Luft fans or its preferred contractor access to your site.

### **YOUR RESPONSIBILITIES**

- You must have the fan/s at home with you in readiness for the installation.
- You must ensure that the product and installation service is suitable for your purpose and site. We are not liable if they are unsuitable.
- Any information you provide will be relied upon by us. You will be liable for any additional costs incurred if your representations are incorrect.
- You must ensure that the site is accessible and safe for the installer to attend and install the product.
- You must give us all relevant information about the site beforehand. You must provide the installer with access to the necessary areas and amenities as required.
- You confirm that you are the home owner or that you have authority from the home owner for the works to be undertaken. You must be at home during the installation.
- Your ceiling must be prepared and ready for installation as per our guidelines. Preparing the ceiling for installation is not under our scope.
- The fixed price installation offer is for installation of fans only and does not include the cost of any fans.

### **NOT INCLUDED**

- There may be circumstances where your new fan can't be installed as the ceiling would not be ready as per our requirement, In these situations, additional items may be required to complete the installation. Any additional works or items require the approval of the customer prior to commencement. Pricing and payment for any additional works should be negotiated directly between the customer and installer.
- At the completion of the installation, there may be some pre-existing issues that are visible such as drill holes, ceiling scratches and scuff marks. The repair of such issues does not fall under our scope.
- Any specialist equipment or tools required for installation, e.g. scaffolding or scissor lift, will be provided by the client and is not in our scope.

## **WARRANTY TERMS**

**WARRANTY IS VOID IF THE CEILING FAN IS NOT INSTALLED BY A TRAINED PERSON.**

**THERE IS NO ONSITE WARRANTY, THE FAN HAS TO BE SENT TO THE COMPANY FOR SERVICING, KINDLY PRODUCE THE PURCHASE DETAILS TO CLAIM WARRANTY.**

**The Following is NOT covered by warranty.**

- Damage from lighting or power surges, damage due to incorrect installation, Damage from over power delivery, water damage, damage arising due to improper power connection, and If installed or used outdoors.
- If used with automation dimmer or remote and regulator simultaneously.
- If Ceiling fans not installed by a licensed electrician.
- Ceiling fan used incorrectly, accidentally damaged, modified in any way or not serviced in accordance with the maintenance instructions.
- Burned motors / motor winding, fused bulbs, CFL tubes LED bulbs, remote and controllers are not covered under warranty. Batteries are not covered under warranty.
- Broken glass, broken blades or any other broken components or any other physical damage is not covered under warranty.
- Shipping cost incurred for sending the faulty fan and the replacement of new fan is not covered under warranty.
- Cost incurred in removal & reinstallation of the fan should be borne by the client.
- Cost incurred in renting of special equipments like ladder, scaffolding, scissors, lift etc., are not covered under warranty.
- Wobbling of fans, bump in the noise of the fan is not covered under warranty.
- Luft is liable to repair or service the faulty part. In rare case where the faulty part cannot be repaired the company will be liable only to replace the faulty component with a new one & is not obliged to refund the amount or replace the entire fan with a new one.

**ANY COMPLAINTS REGARDING MISSING COMPONENTS, MISSING PARTS, PHYSICAL DAMAGES, SCRATCHES, AND ANY OTHER CLARIFICATION WILL BE ENTERTAINED ONLY WITHIN 2 DAYS OF RECEIVING THE FAN, AFTER 2 DAYS COMPANY IS NOT RESPONSIBLE FOR THE SAME.**

### SPECS

- Size 195 X 195 X 402mm
- Colour White with black detail
- Modes High/Medium/Low
- Rated voltage 220-240V~, 50/60Hz
- Rated wattage 35W
- Max. Airflow/CADR 90m<sup>3</sup>/h
- Coverage Area ≤ 11m<sup>2</sup>
- Filter type Replaceable H13 HEPA ALL IN ONE  
(Included / replaced filter sold separately)
- Filter life 2200 hours
- Noise level < 50 dB on high
- Timer 2/4/8 hours
- Night Light N/A
- Child Lock N/A
- Insulation class Class II
- Plug & Play Yes
- IP rating IP20
- Certification CE by Waltek

# LUCCI CONNECT WIFI REMOTE

LUCCI AIR

Lucci Connect allows you to control your fan like never before. This Smart Fan Remote will allow you to control your fan with the remote and from your phone. Set up and control is simple with the easy to use Lucci Connect app. Combine with a smart home hub to enable voice control access and immerse yourself in the ultimate smart home experience.

#### SPECS

- Dimensions 42 x 12 x 110 mm
- Speed Low / Medium / High
- Light on/off
- Only compatible with AC Motor fans

## WHY USE AN EXHAUST FAN?

There are 3 main reasons as to use exhaust fans:

To remove impurities in the air (moisture, smells, smoke, heat etc)

To encourage air circulation within an area

To transfer tempered (warm/cool) air from one place to another

These factors play a part in determining which exhaust fan will be suitable for the desired application. It can also be used to help eliminate condensation and mould in moisture exposed spaces.

This is a general guide to the majority of exhaust fans.

The steps required in picking out the correct exhaust fan are:

Determine what variant of exhaust is required and how it will be mounted (eg wall, ceiling, window etc)

Calculate the area being exhausted (Length x Width x Height). This will give you a figure in m<sup>3</sup> (cubic meters)

Multiply this with the number of air-changes required (8 for a subfloor/meeting area, 13-15 for a bathroom or toilet, 15+ for smoke exhaust). If you like to have long, hot showers or are concerned about steaming up the bathroom then please use a figure of 15-20 air changes per hour

Determine whether to duct directly into the roof space, or through a wall.

### Kinds of Inline fans

**Mixflow Inline Fans:** Mixed Flow Inline exhaust fans are a mixture between the Axial and Centrifugal models. They have good airflow and good pressure characteristics, can be used for longer runs of duct, bends, branches, etc. They show centrifugal fan characteristics from a size of 150mm upwards and axial fan characteristics for sizes smaller than 150mm.

Well Suited Applications for a Mix Flow Motor

Medium/Large bathroom, ensuite or laundry

Installation that has a moderate amount of ducting (from 0-20 meters approx)

**Axial Inline Fans:** Axial fan motors are generally suited to applications that require high extraction at a low pressure. Low pressure means that the fan is not particularly well suited when a long duct run is needed.

Well suited Applications for an Axial motor

A small toilet

A small bathroom, ensuite or laundry

An installation that has minimal ducting (less than a few meters).

### **Centrifugal Inline Fans:**

A centrifugal extraction fan motor is the opposite to an axial motor in terms of its characteristics when dealing with pressure.

The centrifugal motor has been engineered to operate with long duct runs which may have bends, junctions and multiple inlets/outlets.

Well suited Applications for a Centrifugal motor

Large heat transfer systems

Large Sub floor ventilation systems

Servicing a large area

An installation that has a vast amount of ducting (20 meters or more)

HOW TO SELECT EXHAUST FAN		Recommended Air Changes															
<p>1. Calculate the room volume : Length x Width x Height Eg. A Bathroom that is 3m by 2m and 2.5m high = 15m<sup>3</sup></p> <p>2. Calculate required air movement: <b>Room Volume x Recommended Air Changes</b> Eg. 15m<sup>3</sup> bathroom with 10 changes per hour is 15x10=150m<sup>3</sup>/h</p>	<p>So you have to select an exhaust fan with Air delivery of 150m<sup>3</sup>/h or greater.</p> 	<table border="1"> <thead> <tr> <th>RESIDENTIAL PREMISES</th> <th>PREMISE TYPE</th> <th>RECOMMENDED AIR CHANGES PER HOUR</th> </tr> </thead> <tbody> <tr> <td></td> <td>Kitchen</td> <td>10</td> </tr> <tr> <td></td> <td>Bathroom</td> <td>12</td> </tr> <tr> <td></td> <td>Large Bathroom</td> <td>10</td> </tr> <tr> <td></td> <td>Toilet / Powder Room</td> <td>10</td> </tr> </tbody> </table>	RESIDENTIAL PREMISES	PREMISE TYPE	RECOMMENDED AIR CHANGES PER HOUR		Kitchen	10		Bathroom	12		Large Bathroom	10		Toilet / Powder Room	10
RESIDENTIAL PREMISES	PREMISE TYPE	RECOMMENDED AIR CHANGES PER HOUR															
	Kitchen	10															
	Bathroom	12															
	Large Bathroom	10															
	Toilet / Powder Room	10

## FUSION CURTAIN MOTOR

LÜFT®  
ULTRA-QUIET MOTOR COLLECTION

**INDOOR MOTORIZED SHADES SOLUTIONS**

Fusion Curtain Motor comes with advanced technology for Heavier load and quiet operation. It is flexible for manual switch operation meant for automation or wireless remote operation.

PRODUCT NAME	MODEL	RATED TORQUE	SPEED	MOTOR SIZE	RATED VOLTAGE	RATED POWER	IP CLASS
Fusion Curtain Motor (Five Wires)	FCM175	1.5Nm	16cm/s	316x68x53mm (L) (W) (H)	AC100-240V 50/60HZ	65W upto 60kgs	IP20

### FEATURES

- Stop on block
- Soft start and soft stop
- Automatic Limit setting memory
- Flexible super silent design
- Various control options
- Wide Voltage power supply
- Group control
- Fabric rebound journey correction
- Pull to go
- Over-voltage protection
- Manual Switch function
